2019-2020 Board of Education Goals

I. Housing

Reconvene the Citizens Advisory Committee on Instruction and Housing with all stakeholder representatives to develop recommendations to be presented to the school community, detailing a long term, efficient housing plan that preserves the instructional program.

II. Comprehensive Survey and Assessment

Conduct a comprehensive internal district quality survey of all staff members in November in order to assess the current state of our program and operations related to working environment, professional development, and curriculum and instruction.

III. Budget and Programmatic Growth

Develop a sound instructional and operational budget at or within the tax levy limit. Devote 10 percent of the allowable levy increase toward incremental program growth.*

*This assumes no significant or unforecasted state aid cuts or increases in unfunded mandates, including but not limited to increases in TRS or ERS contributions.

IV. Comprehensive Mental Health Initiative

Convene a strategic committee to develop a comprehensive plan for K-12 student mental health support with input from administrators, school counselors, social workers, psychologists, professional registered nurses, instructional specialists and community members identifying short- and long-term training for staff, instruction for students, and resources for families.

V. Technology Integration

Continue K-12 technology integration expansion to implement and infuse the most current instructional technology, including greater student and teacher access to devices, department-specific staff development, and increased instructional software access and support.

Adopted at the August 20, 2019 Board of Education Meeting
