

SCOPE Education Services and
Western Suffolk BOCES Present
Virtual STEAM Enrichment
For Students in Grades K-5

Saturday Mornings

January 2021 – February 2020

1/9, 1/16, 1/23, 1/30, 2/6, 2/13, 2/20, 2/27

\$175 per course

***When registering for a course, you are signing-up for 8 sessions
of the same course.***

Animal Encounters: 8:30am - 9:30am

Each week, students will meet a different animal, will learn about them and similar species. Some examples of animals students will meet are a bearded dragon, rabbit, stick insects, turtles, tortoise, and more!

Ecosystems: 9:45am - 10:45am

Long Island is an amazing place for many reasons, but one of the special reasons is because of the wide variety of ecosystems found here. During this program, students will visit many different ecosystems across Long Island. At each of these ecosystems, students will learn about the different conditions, the different animals that inhabit this ecosystem, and why this ecosystem is important.

Simple Experiments: 11am - 12pm

In the eyes of our educators nothing is more exciting than science experiments. During these sessions, students will be led through simple science experiments that students can perform at home. The instructor will demonstrate simple experiments with students, then will work with students to determine why these experimental outcomes occur. **There is no material requirement for this session, but students will be provided with directions on how to perform the activity at home after the session is complete.**

Registration Begins Tuesday, December 1st
