Mark Secaur, Ed.D

Superintendent of Schools

Daniel Helmes

Assistant Superintendent
for Pupil Personnel Services

Dear Parent/Guardian of 9, 10th, and 11th grade students,

January 2025

It is time to schedule our students for the 2025-2026 school year. We encourage you to participate in the planning of your child's instructional program for the new school year by becoming familiar with the [2025-2026 Program Guide](#). Additionally, we encourage you to discuss educational options with your child.

Teacher/Departmental Recommendations

- Teachers have been busy throughout December and January making course recommendations for your child. Once the portal opens on January 27th, you will be able to view these teacher/departmental recommendations. Please contact your child's classroom teacher(s) directly if you have any questions about the recommendation.

Course Request with the School Counselor

- Parents will have access to view departmental recommendations beginning Monday, January 27th, using this link (<https://smithtown.powerschool.com/public/home.html>). Once logged in you can click "Class Registration"
- Starting January 30th, through March 14th, Counselors will be meeting students and entering their 2025-2026 course requests directly into PowerSchool.
- In order to prepare your child for these meetings, **please have them complete the [High School Scheduling Worksheet](#) to the best of their ability and bring it with them to their meeting.**
- Starting February 28th, parents can view the course selections that have been entered up to that point. After you have reviewed their selections, you can contact your child's counselor directly to make any required adjustments through March 14th. After this date, student requests will be used to create schedules for the 2025-2026 school year. Though there is an effort to schedule every course request, there are no guarantees that all course requests will be honored due to scheduling constraints. Additionally, due to budgetary constraints, there is no guarantee that every course will run for the 2025-2026 school year.

Challenge by Choice

- Students interested in challenging their placement by enrolling in related honors, college, or Advanced Placement courses, and who have taken the prerequisite course(s), should discuss the choice with their counselor during their meeting so they can input the challenge into PowerSchool. **Students should also discuss their interest in taking more challenging coursework with their current classroom teacher and parents/guardians.** For additional information regarding "challenge by choice" please refer to the [2025-2026 Program Guide](#).

Regents Extended Courses

- Due to the district's commitment to preparing students to meet the rigorous NYS graduation requirements, Regents Extended (RE) courses cannot be challenged.

Wilson Technical High School

- Juniors and seniors can attend Wilson Tech. Students who choose a career and technical education program attend their High School for half a day and are bused to Tech for the other half of the school day. Some of the popular programs are Automotive Technology, Culinary Arts, Cosmetology, Nurse Assisting, and Veterinary Assisting. Below you will find a virtual orientation and brochure for students who may be interested in taking advantage of the program. An application must be filled out and returned to your counselor by the deadline. Applications can be picked up in the counseling office or printed from your counseling center google classroom. If you have any questions, please see your school counselor. **Please submit your Wilson Tech Application as soon as possible but before March 1st.**
Admission is rolling and space is limited.

Business/Family and Consumer Sciences/Technology Electives

- Taking electives is a great way for students to find their niche and build lifelong skills that will help them in the future. Smithtown offers a comprehensive list of electives and some tracks will lead to NYS CTE Technical Endorsement on their high school diploma. Please click the links below for an in-depth presentation of these electives.

[FCS](#)

[Technology](#)

Projected enrollments are determined by the number of selections that are made by the students. Therefore, it is important that requests are well-planned and suitable to accommodate the learning needs of your child. Please remember that the availability of the program is subject to fiscal constraints affecting the K-12 operations of the district.

Respectfully,

Kevin Colon

Administrator for Guidance and Related Student Services
